

Change Connector Orientation of XOOT Touch Strip

Document Version 1.0 (10/30/2023)

Do you need the change the direction that that the AUX cable plugs into a XOOT Touch Strip?

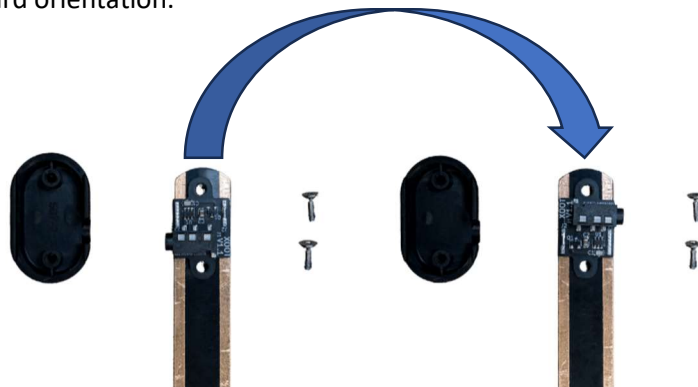

To do this you will need a 2mm Hex Wrench (this smaller wrench is not included with the XOOT_Pro kit).

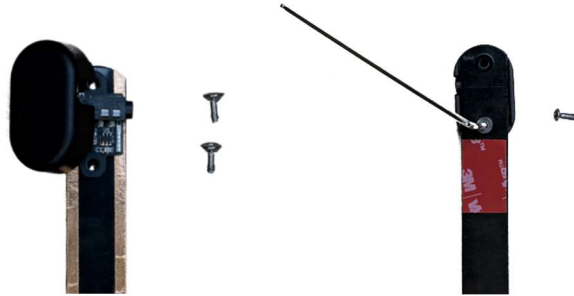

Remove the screws from the pack of the touch strip.

Change the circuit board orientation.

Screw the cover back into place, (but do not over tighten screws).

Once your done. Plug in the touch strip and give it a test.

If you encounter any difficulties [contact XOOT support](#).
